Órgão de divulgação da SBQ – Publicação Trimestral

Programa de Apoio a Publicações Científicas

MCT  CNPq  FINEP

Financiamento: FAPESP - FAPERJ

CONTENTS

Gilberto F. de Sá	1	Presentation
Linus Pauling	6	The so-called icosahedral quasicrystals of manganese-aluminum and other alloys
Christian K. Jørgensen	10	Differential ionization energies and non-classical aspects of quantum electrostatics
Gilles Klopman, Renato Contreras and Arie Aizman	20	The local reaction field (LRF) model of solvent effects as the basis for the analysis of the basicity of alkylamines in aqueous solution
R. A. Bonham and R. S. Barbieri	29	Electron correlation in molecular ground states: some experimental aspects
Luiz Carlos Gomide Freitas	37	Gas phase proton affinities of oxirane and thiirane molecules: an ab initio study
H.F.M. da Costa, J.R. Mohallem and M. Trsic	41	The weight functions for He to Ar Gaussian and Slater type universal basis sets originated by the integral Hartree-Fock method
Eneida G. Lima and Sylvio Canuto	59	A complete fourth-order many-body perturbation theory study of the ground state of SiS
C.P. de Melo	65	A generalized treatment of localized electronic interactions
M. Braga	71	On the σ and π charge transfers in $\text{Ni}(\text{PF}_3)_4$ and $\text{Ni}(\text{PCl}_3)_4$
A. Arnóbio S. da Gama	76	Distant intramolecular electron transfer
Ricardo Luiz Longo, Elson Longo, Alberto N. Senapeschi and Fúlvia M. L. G. Stamato		The influence of the molecular geometry on the barriers to internal rotation
Paulo Pitanga, Myriam S. de Giambiagi and Mario Giambiagi	90	About the correlation between atomic charge fluctuations in a molecule
J. Danon	92	Nuclear hyperfine interactions and chemical bonding in high T_C superconductors
W. M. de Azevêdo, O. L. Malta, G. F. de Sá and I. P. Padovan	96	Fluorescence enhancement in Eu^{3+} doped fluoroborate glasses containing a highly inhomogeneous size distribution of silver particles
H. S. Brandi, Ginette Jalbert, Belita Koiller and N. Zagury	102	The Floquet method applied to solids
J. M. Ferreira and M. D. Coutinho-Filho	107	Effect of Cr^{2+} ions on the magnetic anisotropy of chromium chalcogenide spinels
Carlos Eduardo Leal and Amós Troper	112	Hyperfine fields and local moment formation at impurities in Gd metal
M. C. P. Costa, A. A. Winkler-H and F. Galembeck	120	Density gradient self-generation by osmocentrifugation application to the study of latex particles
Constantino Tsallis	127	Biogenesis: diversity, selection and fractality
Newton Bernardes	129	Thermodynamics: An ideology or an approximation?
M. A. F. Gomes, G. L. Vasconcelos and S. L. Meira	133	Noninteger dimensions and simulations in corrosion
T. K. Das and H. T. Coelho	138	Adiabatic approximation in the atomic and nuclear scales
J. Leite Lopes	146	Weak interaction physics: from its birth to the electroweak model
