

ÍNDICE DE PALAVRAS-CHAVE - QUÍMICA NOVA, VOL. 25, 2002

- (-)-orphiorine; 241
 [3+4] cycloaddition; 203
 2,2'-bipyridines; 668
 2,4-D; 529
 25 years of SBQ; Supl. 1-45
 25th anniversary SBQ; Supl. 1-39
 3,4-dihydroxybenzaldehyde; 741
 5-aminolevulinic acid; 594
- ab initio* and molecular dynamics calculations; 117, 465
 abyssal sediments; 814
 acid soil; 149
 acid-base equilibrium; 684
 acute intermitent porphyria; 594
 adducts; 729
 adsorption; 544
 aggregation pheromone; 32
 AIDS therapy; 1108
 air sampling; 406
 alcoholic beverages; 1074
 aldehydes; 1117
 aluminium; 931
 aluminosilicates; 1145
 aluminum oxide; 490
 amides; 300
 amperometric; 316
 analytical characteristics; 396
 analytical chemistry; Supl. 1-62
 analytical methods; 609
 analytical quality; 657
 anatase; 1027
 anthocyanins; 680
 antiasthmatic drugs; 825
 antiinflammatory, analgesic and antithrombotic properties; 129
 antileukotrienes; 825
 antimicrobial hydrazides; 231
 ants; 1091
 aquatic humic substances; 1103
 aquatic pollutants; 1061
 arc-furnace; 59
 archaeological pottery; 368
 archaeometry; 368
 atmospheric chemistry of sulfur (IV); 259
 atmospheric particles; 902
 atomic absorption spectrophotometry; 548
 atomic spectrometry; 483, 1132
 authenticity; 609
 axial view configuration; 1194
 azaindole; 1165
 aziridines; 921
- baker's yeast; 567
 barium chloranilate; 254
 basaltic soils; 548
 batch and flow injection; 1132
Bauhinia; 449
 bauxite; 490
 bioactive N-acylhydrazone compound; 1172
 bioactive N-acylhydrazones derivatives; 129
 biochemistry graduates; 866
 bioleaching; 20
 biological activity; 321, 1165
 biomarkers; 814
 bioreductive prodrugs; 976
 biosensor; 455
 biosensors; 835, 1012
 biosurfactants; 772
 biotransformations; 567
 blends; 943
 bond stretching coordinates; 648
 bonding agent; 921
 bonding agents; 107
 Borodin, 1040
 bottom ash; 926
 bovine serum albumin; 757
 Brazil; Supl. 1-31, 62
 Brazilian Chemical Society; Supl. 1-75, 82
 bundles; 59
 Bursaceae; 1078
- capillary electrophoresis; 412
 carbamate insecticides; 214
 carbon tetrachloride sonolysis; 558
 carbonyl compounds; 1117
 catalysis; Supl. 1-12
 catalyst; 209, 935
 catalytic reactions; 985
 cathodic materials; 287
 cathodic stripping voltammetry; 808
 chalcone; 62
 chemical composition; 321, 449
 chemical durability; 186
 chemical education; 680, 689
 chemical metrology; 111
 chemical synthesis; 897
 chemical vapor generation; 1132
 chemically modified electrode; 741
 chemiluminescence; 1003, 1191
 Chemistry; Supl. 1-75, 1197
 chemistry and music; 1040
 chemistry education; 153
 chemistry graduates; 696
 Chemistry of Natural Products; Supl. 1-45
 chemistry teaching; Supl. 1-14
 chemometric methods; 439
 chemometrics; 949
 chemotaxonomy; 533
 chitosan; 943
 chloride poisoning effect; 392
 chromium(VI); 499
 chromium; 572
Citrus oils; 1091
 classical trajectories; 579
 clay slurries; 1194
 cloud point; 483
 cluster analysis; 902
 CO conversion; 181
 CO stretching bands; 648
- coastal waters; 372
 collagen; 943
 composite solid propellant; 221
 computational chemistry; 117, 465
 conductimetry; 149
 conductivity; 639
 coordination compound; 957
 coordination compounds; 1155
 copaiba oil authenticity control; 1057
 copaiba oil; 273
Copaifera; 273, 429
 copper recycle; 312
 copper; 729, 808
 correction factors; 639
 corrosion; 10
 coumarin; 533
 coupling; 668
Croton cajucara; 429
 crude extract; 455
 cryoscopy; 844
 CVAFS; 372
 cyclic peroxide; 364
 cyclic voltammetry; 5, 741
 cyclopentadienyl; 762
 cytochrome-c; 5
- DDT; 995
 degradation; 529
 design of experiments; 327
 determination; 420
 diallylsulfide derivatives; 5
 didactic experiment; 684
 differential scanning calorimetry (DSC); 221, 849
 diffusion in liquids; 1022
 directed metallation group; 89
 diterpenes; 273
 dithiocarbamates; 525
 dithizone; 748
 DNA damage; 594
 DNA; 572
 doping control; 1096
 DOSY; 1022
 drug delivery; 1181
 drug design; Supl. 1-39
- effective pair potential; 1029
 effluents; 736
 eighteenth century chemistry; 1211
 electroanalysis; 1012
 electroanalytical chemistry; Supl. 1-25
 electrocatalysis; 962
 electrocatalytic hydrogenation; 1186
 electrochemical sensors; 835
 electrochemical systems; 99
 electrochemical techniques; 20
 electrochemical treatment of effluents; 477
 electrochemistry; 470, Supl. 1-25
 electron transfer; 123, 624
 electronic conducting polymers; 287
 electropolymerization process; 741

- electrothermal atomic absorption spectrometry; 396
 ellipsometry; 757, 794
 enantioselective reduction; 567
 energetic materials; 722
 environment; 995
 environmental chemistry division; Supl. 1-7
 environmental chemistry; Supl. 1-7
 environmental pollution; 191
 enzyme; 455
 enzymeless biosensors; 123
 etheno DNA adducts; 777
 ethnopharmacology; 429
 ethyl carbamate; 1074
 ethylene; 762
 europium luminescence; 1067
 evaluation; 696, 866
 evolution; 533
 exchange constants; 1103
 exocyclic DNA adducts; 777
 extraction; 420
- factorial design; 246
 fatty acids; 914
 feedback; 99
 fertilizer industry; 191
 films; 794
 fish; 995
 flame atomic absorption spectrometry; 748
 flocculation/coagulation; 736
 flow analysis; 1191
 flow injection analysis; 412, 842
 flow injection spectrophotometry; 387, 553
 fluorine distribution; 191
 folk medicine; 449
 force constant; 957
 four-point probe method; 639
 FTIR-PAS; 722
 fuel cells; 470
 functionalization; 668
 functionalized inorganic oxides; 616
- gamma radiation; 529
 gas adsorption; 327
 gas chromatography; 544
 gas phase ion chemistry; 766
 GC-MS; 1074, 1096
 general chemistry; 1034
 genetic algorithm; 46, 439, 539
 glass; 731
 glass ceramic; 731, 926
 glassy state; 330
 glucocorticosteroids; 1096
 glycine; 729
 glyphosate; 420, 589
 graphite electrode from common batteries; 1186
 green chemistry; 660
 Griess Saltzman reagent; 353
- hair analysis; 37
 harmane; 241
 heavy metal; 753, 1145
 hemodialysis; 931
 herbicides; 203
- heteroaromatic compounds; 89
 heterogeneous catalysts; 985
 hexamethyldisilazane; 766
 Hill reaction; 196
 historical facts and trends; Supl. 1-45
 history of science; 689
 history; Supl. 1-12, 25
 HIV life cycle; 1108
 HMX; 722
 HPLC; 616
 HPLC/FS; 214
 HPLC/PDA; 717
 HPLC-APCI/MS; 214
 HRGC-MS; 15
 humic acids; 53, 909
 hydrogen atom; 159
 hydrogen peroxide; 1191
 hydrogen production; 181
 hypoxic cells; 976
- ICP-MS; 37
 immunoanalysis; 316
 immunosensor; 316
 indoor air pollution; 384
 inductively coupled plasma optical emission spectrometry; 1194
 influence in mechanical properties; 107
 infrared; 392, 563
 infrared spectra of carbonyl complexes; 648
 infrared spectroscopy; 46
 inorganic chemistry; Supl. 1-67
 instrumentation; 412, 842
 insulin; 572
 intercalation process; 99
 intercalation; 83
 interdisciplinary activities; 502
 interferences; 379
 interlaboratorial program; 657
 international cooperation; Supl. 1-67
 intervalence charge transfer; 624
 iron; 1155
 iron oxides; 181
- James Hutton (1725-1797); 689
 Joseph Black (1728-1799); 689
- Karl Fischer; 657
 ketones; 1117
 kinetic; 364, 1034
 kinetic analysis; 1003
 kraft mill effluent; 477
- lactones; 203
 landfill leachate; 477
 LASSBio-294; 1172
 last 25 years; Supl. 1-31
 lateral validation; 231
 layered materials; 83
 lead; 379
 legislation; 589
 leukotriene; 825
 lignin; 736
 lime; 149
 linearidade; 862
 lipid peroxidation; 777
 liposome; 1181
- lipoygenase; 914
 lithium niobate; 1067
 log *P*; 1061
 logistic equation; 99
 low-cost adsorbents; 1081
 luminol; 1003
- magnetic iron removing; 926
 magnetism; 935
 manganese; 729
 mangrove; 753
 Materials Chemistry; Supl. 1-75
 Medicinal Chemistry Division (DMD); Supl. 1-39
 membrane; 893
 mercury; 372
 metal complexes; 1103
 metal toxicity; 1211
 metallic ions; 1086
 metallo-organic decomposition; 69
 metals; 246
 metazolol; 553
 methods; 676
 micelar model; 909
 microhardness; 186
 microwave heating; 660
 milk proteins; 609
 mixed-valence; 624
 MOD; 69
 model compounds; 572
 modified electrode; 123, 1186
 modified electrodes; 1012
 moisture; 676
 molar mass determination; 844
 molecular geometry; 358
 molecular hybridization and bioisosterism in drug design; 129
 molecular mechanics; 957
 molten salts; 226
 molybdenum disulfide; 83
 Monte Carlo; 358
 morphology; 186
 multivariate calibration; 949
- N,N-dimethylformamide; 893
 NADH electrocatalytic oxidation; 741
 nanocomposites; 287
 nanoparticles; 935
 nanotubes; 59
 natural chelators; 1155
 natural pH indicator; 684
 natural waters; 748
 neural network; 539
 neutron activation analysis; 368
 new cardiotoxic derivative; 1172
 nitrogen dioxide; 353
 North Atlantic; 814
 numerical methods; 159
- occupational health; 384
 organic chemistry overview; Supl. 1-82
 organic synthesis; 660
 organolanthanides; 762
ortho-metalation; 89
 oxide; 897
 oxidizing species generation; 558

- oxoacidic; 226
- p*-anisidine; 563
- p*-menth-3-ene-1,2,8-triol; 1078
- paper chromatography teaching; 680
- paracetamol; 387
- parathion; 53
- partial least squares; 1061
- passive sampling; 406
- patents; 321
- Pechini method; 1067
- performance analysis; 117, 465
- permanent chemical modifier; 246
- perspectives in AIDS therapy; 1108
- pesticides; 214
- pharmaceutical formulations; 387, 553
- pharmacological effects; 449
- phase transitions; 330
- photobiochemistry; Supl. 1-34
- photobiology; Supl. 1-34
- photochemical reactions; 1034
- photochemistry; Supl. 1-34
- photodegradation; 53
- photodimerization; 62
- photodiode; 1191
- photodynamic therapy; 801
- photoelectrochemical treatment; 477
- physical chemistry; Supl. 1-31
- physical-chemical speciation; 372
- physic-chemistry characteristic; 589
- phytochemistry; 429
- platform geometry; 379
- Plumbago auriculata*; 717
- Plumbago scandens*; 717
- Poisson-Boltzmann equation; 1029
- polarization; 794
- pollution; 753
- polynuclear porphyrins; 962
- polysaccharides; 757
- post-graduation; 153
- potassium alum; 490
- potatoes; 214
- power plant; 470
- preconcentration; 483, 748, 931
- problem; 1197
- propellants; 107
- propolis; 321
- Protium heptaphyllum*; 1078
- pulsed field gradient spin-echo NMR; 1022
- pyridine; 525
- QSAR; 231
- quality assurance; 111
- reaction dynamics; 579
- reactivity of boranes; 300
- recalcitrant compounds; 78
- reduction; 300
- reference intervals; 37
- research in Brazil; Supl. 1-67
- research in chemical education; Supl. 1-14
- residue; 312
- resistivity; 639
- results evaluation; 849
- reversed phase; 616
- rhynchophorol; 32
- Rhynchophorus palmarum*; 32
- RMN ²⁹Si and ¹³C; 27
- royal jelly; 676
- RRKM calculations; 579
- Rubiaceae; 241
- saccharin; 849
- SBQ; Supl. 1-7, 75, 82
- Schrödinger equation; 159
- science and art; 1040
- science education; Supl. 1-14
- scientific production; Supl. 1-62, 67
- Sebastiania argutidens*; 15
- secondary lithium batteries; 287
- separation; 1086
- separations; 483
- sequential extractions; 548
- SFE method; 214
- silica; 27
- silica gel; 499
- silicon clusters; 539
- silyl cation addition; 766
- Simira glaziovii*; 241
- site binding model; 1029
- slurry reagent; 254
- solenoid valve; 842
- sol-gel; 27, 209, 563, 893, 1027
- sol-gel process; 835
- solid phase; 1086
- solid state; 62
- solid tumor; 976
- solubility; 226
- solvent effect; 364
- sonochemical reactions; 558
- soybean; 914
- speciation; 808
- spirits; 1074
- stationary phase; 563
- steelmaking slag; 731
- steroids; 241
- Structure Activity Division (DSA); Supl. 1-39
- students' social and economic profile; 1204
- Styracaceae; 349
- Styrax camporum*; 349
- sugars determination; 46
- sulfite; 259
- sulfur dioxide; 406
- sulphate; 254
- sulphur dioxide; 259
- supercritical fluid extraction; 1091
- supramolecular chemistry; 962
- surface organometallic chemistry; 985
- surface tension; 909
- surface-active compounds; 772
- surfactants; 772
- synthesis; 668
- synthetic methods; 1165
- synthetic zeolites; 1081
- systematic search; 439
- teaching; 1197
- teaching apprenticeship; 153
- teamwork; 502
- tert-butyl alcohol; 844
- textile dyes effluent; 477
- textile effluents; 78
- thermal stability; 563
- thermodynamic and kinetic models; 330
- thin film; 897
- thin films; 69
- thin layer chromatography; 196
- Thiobacillus ferrooxidans*; 20
- tin chemistry; 1211
- TiO₂; 10
- tissue; 455
- titania; 1027
- titanium; 10
- tomatoes; 196
- toxic metals; 1081
- toxicity: legislation; 589
- training and jobs; 696, 866
- transfer hydrogenation; 921
- transition metal oxides; 287
- treatment; 312
- treatment processes; 78
- triadimenol; 544
- triethanolamine; 353
- triiodide generation; 553
- triterpenes; 15, 349
- tumor; 801
- tungsten coil; 396
- uncertainty; 111
- undergraduate course; 1204
- undergraduate evaluation; 1204
- urban air pollution; 902
- urea; 358
- vanadium(IV); 525
- vanadium and titanium oxide; 209
- variables search; 327
- vesicle; 1181
- viscosity analysis; 221
- visudyne; 801
- volatile organic compounds; 384
- wastewater; 1145
- XPS; 10, 392
- X-ray diffraction; 1027
- X-ray fluorescence; 949
- zirconium(IV) oxide; 499
