

ÍNDICE DE PALAVRAS-CHAVE - QUÍMICA NOVA, VOL. 27, 2004

- (+) cyclooolivil carbonate; 188
 [3+4] cycloaddition; 241
¹⁴C dating; 323
 3,3-diphenylpropylamines; 72
 3,3'-*O*-dimethylellagic acid; 536
 β-enamino esters; 89
 β-enamino ketones; 89
- ab initio* calculation; 206
ab initio calculations; 42
 acetophenone cyclic diperoxide; 920
 acetylcholinesterase; 655
 acid rain; 855
 adsorption; 499, 849
Aedes aegypti; 46
Ageratum conyzoides; 55
 air pollution; 855
 alcohols; 287
 algae; 139
 alkoxide; 84
 alkyl ferulates; 62
 aluminium(III) determination; 901
 aluminum sulphate; 715
 Alzheimer's disease; 655
 amides; 79
 ammonia; 123
 AMPc; 489
 analytical chemistry; 139
 analytical methods; 586
 antiedematogenic activity; 905
 antioxidant capacity; 980
 antipsychotic drugs; 447
 apomorphine; 949
 applications of synthetic peptides; 781
 arsenic speciation; 261
Aspidosperma parvifolium; 897
 atmospheric aerosols; 567
 atomization behavior; 528
 automated device; 661
- bactericidal activity; 689
 baker's yeast; 421
 balance; 1021
 bioavailability; 231
 biopolymer; 615
 bioremediation; 139
 biotransformations; 146
 bisphosphonates; 456
 blue phosphor; 706
 bromine recovery; 320
Brosimum acutifolium; 371
 BTXs; 441
- Caesalpinia echinata*; 414
- cafeic acid; 79
 cancer; 308
 capillary gas-chromatography with splitless inject; 561
 carbamazepine; 1004
 carbon nanotubes; 986
 carbon paste electrode; 725
 catalysts; 472
 cathodic stripping voltammetry; 417
 CaTiO₃; 862
 cation exchange; 734
 CEME; 508
 certified reference material; 993
 cheeses; 293
 chemical analysis; 678
 chemical synthesis; 798
 chemiluminescence; 337
 chemistry; 293
 chemistry courses; 358
 chlorogenic acids; 525
Cinnamomum australe; 196
 classical trajectories; 483
 clofentezine; 744
 CO oxidation; 35
 CO₂ adsorption; 862
 coal; 58
 coal tar; 193
 combustion method; 706
 commercial kits; 169
 composting of sawdust; 399
 conformational analysis by NMR; 371
 containers' labels; 837
 contaminated soil; 582
Copaifera spp.; 236
 copper; 213, 226
 copper salts; 678
 critical micelle concentration; 701
 cucurbitacin; 944
 curricula guidelines; 358
 cyclic voltammetry; 980
 cyclodextrin; 882
 cyclopropanoid fatty acids; 404
- data acquisition; 313, 825
 decrepitation; 58
 defensin; 27
 degradation; 555
 demethylation; 593
 desorption; 849
 destabilization of suspensions; 715
 dichlorvos; 911
 diclofenac; 555
 diesel exhaust after-treatment; 472
 diesel particulates; 472
- diffusion through glass; 668
 digital multimeter; 313
 dimethyl ether; 42
 dip coating; 183
 dithiolate; 76
 DNA-damaging activity; 196
 dopamine receptor ligands; 447
 dopaminergic agents; 949
 drop-weight method; 492
 drug delivery; 131
 drug incorporation; 131
 DSC; 889
 dyes; 22
- EDTA; 106, 829
 education in analytical chemistry; 832
 education in the 19th century; 349
 educational software; 489
 EIS; 970
 electroanalysis; 790, 911
 electrocatalysis; 301
 electrocatalysts; 648
 electrocatalytic hydrogenation; 301, 550
 electrocatalytic properties; 866
 electrochemical determinations; 790
 electrochemistry; 813
 electrode processes; 813
 electroflotation; 387
 electron stimulated desorption; 160
 electronic configurations; 958
 electro-oxidation; 648
 electrostatics in proteins; 640
 electrothermal atomic absorption spectrometry; 528
 embedded phases; 270
 emission quantum yield; 709
 energetic material; 540
 energetic materials; 889
 energy; 513
 environment; 315
 environmental chemistry; 674
 environmental education; 332
 environmental proxy; 763
 enzymatic alcoholysis; 496
 enzymatic reactions; 337
 erbium; 367
 erectile dysfunction; 949
 erythrocyte membrane; 66
 essential oil; 55, 916
 essential oil constituents; 46
 estuarine sediments; 378
 ethylbenzene dehydrogenation; 247
 ethylenedinitrilotetraacetate; 106
 evolution; 1021

- experimental activities; 326
 experimental courses; 164
 experimental design; 496
 explosive; 849
 extraction; 96
- factorial design; 725
 fat-soluble vitamins; 96
 Feigl's techniques; 169
 female education in Brazil; 349
 fine spheroidal particles; 706
 flame atomic emission photometry; 832
 flavonoids; 79
 flow analysis; 313, 337
 forensic science; 409
 fruits; 744
 FT-MIR-NIR; 540
 FTNIR; 218
 fuel cells; 648
 fumed silicon dioxide; 561
- gas chromatograph; 739
 gas diffusion; 545
 gas-liquid scattering; 483
 GC-MS; 193, 720, 892
 genetic resources of plants; 55
 geo-accumulation index; 763
 gunshot residues; 409
- Hansch analysis; 631
 heavy metals; 378, 734
 hematite; 247
 herbicides; 241
 high *cis* polybutadiene; 277
 high resolution gas chromatography; 236
 history of Chemistry in Brazil; 342
 history of the sciences; 342
 HMX; 889
 HPLC; 22, 157, 270, 540, 897
 human health; 593
 humic acids; 701, 964
 humic acid structures; 399
 hybrid materials; 730
- immobilization; 623
 implicit theories; 326
 individual isomers; 586
 inductively coupled plasma-mass spectrometry; 409
 industrial applications; 146
 industrial coconut wastewater; 387
 industrial effluents; 818
 infrared spectra interpretation; 670
 infrared spectra of organic compounds; 670
 infrared spectroscopy; 670
 instrumental analog signals; 825
 instrumental analysis; 832
 instrumentation; 747
- interaction; 10
 interdisciplinarity; 332
 interlaboratorial program; 993
 intracellular signaling; 489
 ion chromatography; 503
 ionic composition; 855
 ion-selective electrode; 901
 iron (II); 76
 iron oxide particles; 715
 isocyanide; 76
- jelly; 22
- kinetics in solution; 920
- lab-made interface; 825
 Laboratório Químico-Prático do Rio de Janeiro; 342
 laboratory; 674
 laboratory chemicals; 837
 lake sediment; 231
 Langmuir-Blodgett technique; 661
 lanthanide cryptate; 709
 lanthanum; 862
 lapachol; 157
 Lauraceae; 196
 layer-by-layer technique; 661
 layered double hydroxides; 574, 601
 lead; 251, 754
 legislation; 771
 Leguminosae; 414
 lignans; 188
 limestone; 58
 lipases; 496, 623
 liquid scintillation counting; 323
 liquid surface; 483
 local anesthetic; 66
 long-pathlength spectrophotometry; 807
- Machaonia brasiliensis*; 525
 management of residues; 674
 manganese determination; 50
Maprounea guianensis; 62
 mass determination; 1021
 materials; 84
 mechanical equivalent of heat; 513
Melaleuca alternifolia; 536
 mercury; 17, 763
 metal complexes; 206
 metal ion adsorption; 5
 metal recovery; 315
 metals; 964
 methods of preparation; 89
 methylation; 593
 microemulsions; 131
 micro-heater device; 50
 micro-organisms; 293
 microtubules; 308
- microwave radiation distribution; 1012
 microwave-assisted synthesis; 1012
 mobility; 17
 model; 574
 modified electrode; 964
 modified electrodes; 550
 molecular dynamics; 27
 molecular mechanics; 882
 MSPD; 892
 multicommutated flow system; 50
 multivariate calibration; 1004
Myrcia; 916
Myroxylon balsamum; 46
 Myrtaceae; 916
- nanocomposites; 393, 798
 nanoparticles; 555
 nanotechnology; 986
 national curriculum guidelines; 164
 natural products; 308, 655
 natural water digestion; 695
 neodymium; 367
 neodymium catalysts; 277
 neutralization; 123
 neutron activation analysis; 231
 nickel catalysts; 925
 nitrates; 1016
 NO_x; 432
 NO decomposition; 226
 NO selective reduction; 432
 noble metal efficiency; 550
 non-esterified fatty acids; 561
 non-linear Poisson-Boltzmann equation; 640
 normal coordinate analysis; 664
 Nuclear Magnetic Resonance; 66
 nucleosides; 496
 numeric models; 567
- ODDS; 456
 oil and fats; 146
 optimization of electrochemical properties; 725
 organochlorinated pesticides; 739
Ottonia corcovadensis; 79
 oxidation; 199, 287
 oxindole alkaloids; 878
 oxyallyl cations; 241
 ozonation process; 818
 ozone treatment; 503
- paper mill sludge; 399
 particulate matter; 567
 partitioning; 695
 Pauling; 356
 PCB; 934
 PCDD/PCDF; 934
 pedagogical nature of practical work; 326
 peptides; 781
 perovskites; 35

- pesticides; 720, 744, 892, 911
pharmacological activity; 461
phenols; 193
pheromones; 421
photocatalysis; 689
photoluminescence; 862
physical exercise; 980
phytomedicines; 508
Piperaceae; 79
 pK_a calculations; 640
plasma; 251
PLS; 218
polarography; 261
polyaniline; 393
polyhydroxyalkanoates; 615
polymer resins; 754
polymers; 160, 623, 798
polynitrated porphyrins; 199
polystyrene; 925
porphyrin; 958
potentiometry; 901
precursor salts; 866
Princess Isabel's education; 349
prodrugs; 456
propane oxidation; 35
purified biomaterials; 417
- QCM; 970
QSAR-2D; 631
quality control; 678
quantification; 96
quantum-mechanical calculation; 882
- R&D; 508
Ralstonia eutropha; 615
reagent evolution; 837
reduction of organic compounds; 301
remediation; 441
residual solutions; 320
residue treatment; 320
review; 944
rhodanine; 905
Rice-Ramsperger-Kassel-Marcus theory; 42
risk to environment and health; 934
Rubiaceae; 878
ruthenium; 106
rutheniumporphyrins; 199
- salicylic acid acetate; 1012
sambaquis; 323
Schiff bases; 72
schizophrenia; 447
science teaching; 332
- scientific initiation program; 164
scolecite; 734
secologanoside; 525
sediment; 873
sediments; 17
semicarbazones; 461
semi-empirical methods; 72
separation; 747, 754
separation methods; 771
sequential injection analysis; 545
sewage; 378
Shiff's base; 213
silicon metal of chemical grade; 993
SnO₂/Sb anodes; 866
sodium coulometer; 668
sodium diffusion; 668
software development; 664
soil; 739
soil column; 499
sol-gel; 84, 183, 730, 986
solid phase extraction; 213
solid-phase spectrophotometry; 807
solubility; 1016
solvation; 27
solvent effect; 920
soot; 472
speciation; 695
speciation analysis; 251
spectral region selection; 218
spectrophotometric titration; 829
spectroscopic properties; 367
spectroscopies; 958
spectroscopy and
 conductimetric determination; 701
spent catalyst; 315
SPME; 720
spot tests; 169
SPR; 970
square wave voltammetry; 790
stabilization; 582
stationary phases; 270
Sterculia striata; 404
Sterculiaceae; 404
stereochemistry; 878
structure-activity relationships; 631
Strychnos guianensis; 188
styrene; 247
styrene copolymers; 925
sulfide; 545
supporting electrolyte; 813
surface tension; 492
synthesis; 421, 601, 709, 781
- TEMPO; 287
terpenoids; 79
the Chemist's education; 358
theoretical calculations of
 di-hydroxyphenylflavan; 371
theoretical methods; 10
theory/practice; 492
thermodynamic properties; 574, 1016
thermodynamics; 513, 601
thermogravimetry; 5
thiazolidinediones; 905
thin film; 183
thiosemicarbazones; 461
three-way catalyst; 432
time-of-flight spectrometer; 160
titanium dioxide; 689
total chlorogenic acid; 586
trans(-)-caryophyllene copalic acid; 236
treatment; 818
triadimenol; 499
triazine dyes; 417
triterpenes; 62, 536
triterpenoid; 944
trivalent metal cations; 730
TS-FF-AAS; 873
- uleine; 897
Uncaria guianensis; 878
unified chromatography; 747
UV-VIS spectrophotometry; 807
- V₂O₅; 393
validation; 157, 771, 1004
variation; 123
vermicompost; 5
vibrational frequencies; 206
vibrational spectroscopy; 664
vitamin C; 356
volatiles; 414
voltammetry; 261
- wastewater treatment; 387
water; 739, 873
water analysis, bromide and bromate; 503
water contamination; 441
- xylene orange; 829
- zeolite; 582
zeolites; 226
Ziegler-Natta catalyst; 277
zinc oxide; 10
zirconium permanent; 528
