

ÍNDICE DE PALAVRAS-CHAVE - QUÍMICA NOVA, VOL. 28, 2005

- [4+3] cycloaddition; 444
 1,2,4-oxadiazol; 492
¹H NMR assignment; 492
 5-aminolevulinic acid; 483
 II-VI semiconductor; 761
 α -zirconium hydrogenphosphate; 723
 α -zirconium(IV) hydrogenphosphate; 46
 β -1,3 glucanases; 871
 $(+/-)$ -monastrol; 1010
 11-membered macrocycles; 1023
¹³C NMR data; 996
 2-iodobenzoates; 1023
 H_2O_2 /zero-valent iron system; 226
(R,S)-ibuprofen; 614
- ab initio* calculation; 30
 absolute configuration; 1061
 Academic Spin-Off; S26
 acid precipitation; 371
 acidification; 756
 açaí; 610
 adsorption; 544, 1014
 adsorption isotherm; 822
 adsorption process; 433
 advanced oxidation processes; 61
 aerosol analysis; 179
 Agenda 21; 103
 air/water interface; 502
 alcohols; 1061
 aliphatic-aromatic copolyesters; 188
 alkaloids; 224
 alkanes; 364
 allelopathy; 451
 aluminium polyhydroxication; 777
 aminoacetone; 483
 amitriptyline; 456
 angular correlation; 529
 antibacterial; 678
 anticancer agents; 118
 antifungal; 601
 antifungal compounds; 991
 antimarial; 244
 antimicrobial activity; 986
 antimony; 511
 antiviral activity; 421
 aromaticity; 929
 arsenic; 579
 arsenic(III); 217
 aryl radical cyclization; 1023
 ascidian; 192
 ASTM methods; 478
 atmosphere-soil exchange; 968
 atmospheric aerosol; 859
- atmospheric precipitation; 371
 atmospheric sampling; 179
 atomic dispersion; 393
Auxemma glazioviana; 591
 azo-dyes; 226
- Baccharis*; 85
 bauxite; 535
 Bignoniaceae; 199
 bioactive compounds; 637
 biodiesel; 19
 biological activity; 77, 892
 biological samples; 880
 biomimetic sensors; 1087
 biotechnology; S64
 biotransformation; 642
 bisphosphonates; 274
Bixa orellana; 149
 bixin; 149
 bone diseases; 274
 boron; 1014
 boron-doped diamond; 1000
 bromate; 716
 brucite; 24
 BTXs; 61
Burseraceae; 183
- Calophyllum brasiliense*; 575
 capillary electrophoresis; 683
 capillary electrophoresis instrument; 1106
 carbohydrate; 792
 carbon dioxide; 622
 carbon nanofiber; 42
 carboxylic acids; 24
 cassava; 596
 catalysts; 264
 Cd(II); 145
 cements; 813
 characterization; 502, 739
 chemical composition; 57
 chemical education; 364
 chemical industry research and development; S104
 chemical innovation and production; S79
 chemical interesterification; 633
 chemical metrology; S91
 chemical process industry; S104
 chemical product grades; S100
 chemical recycling; 188
 chemical research/Brazil; S44
 chemical research/proposals; S44
 chemical sciences observatory; S44
 chemical waste; 157
- Chemist profession; S14
 Chemist's education; S14
 Chemistry courses; S11, S14, S41
 Chemistry in Brazil; S52
 chemistry technician; 350
 Chemistry; 1123, S18
 chemotherapy; 511
 chiral drugs; 683
 chitinases; 871
 chromatography; 927
 clays; 137
 cloud-point extraction; 426
 cluster; 402
 cobalt oxide; 587
Cochlospermaceae; 57
Cochlospermum vitifolium; 57
 COD; 838
 coffee; 637
 colorimetric assay; 892
 combinatorial chemistry; 73, 670
 combustion; 957, 1055
 commercial kit; 414
 composite electrode; 456
 composites; 229
 computer; 360
 conceptual understanding; 335
 conductive glass; 345
 conjugated polymers; 289
 contaminated effluents; 433
Copaifera multijuga; 719
Copaifera sp.; 519
 copper(II) exchanged zirconium phosphat; 46
 corn; 596
 correlation graphs; 539
 corrosion inhibitor; 756
 coumarin; 575
 counter-current chromatography; 983
 CPC reactor; 921
 CPE-mineral; 901
 cross metathesis; 692
Croton cajucara; 519, 719
 crystal field parameters; 153
 crystal violet; 583
 current uses; 166
 curriculum challenges; S11
 CVD boron-doped diamond growth; 317
 cycloartane; 801
 cycle-(non-)specific agents; 118
- decolorization; 629
 degradation; 226
 degree of conversion; 229

- dental; 813
 derivatization; 852
 Descoberto River; 565
 developing nations; S48
 diamagnetic corrections; 340
 diamond electrodes; 317
 diazepam; 773
 difficulties for R&D and innovation; S76
 digital image analysis; 548
 dip-coating; 141
 dipyrone; 783
 discontinuous frying; 947
 dissolution mechanisms; 901
 Distrito Federal; 565
 DMA; 255
 DNA inter-strand cross-linking
 (ISC agents); 118
 dropping out; S41
 drug synthesis; 727
 drugs; 678, 880
 dynamic headspace analysis; 1111
 education; S18
 education and labour; 350
 EDXRF; 579
 electrocatalysis; 664, 1066
 electrocatalysts; 1066
 electrocatalytic hydrogenation; 1111
 electrochemical techniques; 901
 electrochemistry; 317
 electroflocculation; 766
 electron transfer; 887
 electronic spectra; 153
 ellipticine; 30
 enantioselectivity; 614
 endophytic fungus; 991
 entrepreneurship; S18, S26
 environmental chemistry; 130
 environmental contaminants; 462
 enzymatic browning; 548
 enzymatic reactions; 414
 equilibrium partition coefficient; 426
 essential information; 739
 esters; 792
 ethanol steam reforming; 587
 ethoxylation of ROH; 264
 ethyl esters; 19
 ethylbenzene; 37
 ethylene oxide; 264
 Eu III; 238
 experimental design of mixtures; 1116
 extracellular hemoglobin; 829
 extraction and separation techniques; 1076
 factor analysis; 371
 factorial design; 713
 ferrioxalate; 847
 ferrous ion; 1102
 FIA; 145
 films; 964
 fine chemistry; S79
 flavonoids; 85, 834
 flour improver; 716
 flow cell; 337
 flow injection analysis; 414
 flow injection spectrophotometry; 797
 flow injection turbidimetry; 783
 flow-based; 739
 flu and antiinfluenza drugs; 306
 fluorescein; 756
 fluorescence polarization; 337
 flux chamber; 968
 forest soils; 329
 Freundlich isotherm; 438
 Friedel-Crafts acylation; 703
 FTO-glass; 345
 FT-Raman spectroscopy; 229
 fuel cell; 1066
 fundamental principles and applications; 646
 furan; 809
 gas chromatography; 478
 general chemistry textbooks; 335
 generic drugs; S107
 geochemistry of waters; 565
 germination enhancement; 1006
 glass; 813
 glyphosate; 1038
 gold; 402
 Gouy method; 340
 graduate course; S41
 grafting; 24, 393
 Green Chemistry; 103
 ground water; 380
 groundwater; 383, 788
 herbicide; 975
 herbicides; 380, 444, 605, 847
 hexacoordinate; 829
 hexosamines; 483
 high performance liquid
 chromatography; 274, 380, 683
 historical development; 166
 history and philosophy of science; 335
 homogeneity test; 497
 homogeneous precipitation method; 250
 honey; 713
 HPLC; 50
 HPLC analysis; 852
 human blood; 910
 hydrazine decomposition; 42
 hydrochemistry; 383
 hydroelectric power area; 383
 hydrogen oxidation reaction; 664
 hydrogen peroxide; 405
 hydrogen production; 587
 hydrous niobium oxide; 250
 hyperfine interactions; 529
 ICP OES; 137
 immunoassays; 462
 indan; 703
 indicators for success in innovation; S86
 indigo blue dye; 766
 indigo dye; 629
 indinavir sulfate; 50, 54
 induced fit; 95
 industrial effluents; 130
 industries; 788
 nonexistent colors; 897
 innovation dynamics; S86
 innovation environment; S76
 innovation factors; S86
 innovative drugs in Brazil; S56
 inorganic ion exchanger; 250
 inorganic ions; 1106
 insulating oil; 535
 intellectual property; S36
 intercalation; 723
 internal standard; 539
 in-tube solid-phase microextraction; 880
 invading plants; 199
 ion exchange; 211
 ion exchange chromatography; 716, 719
 IPM; 472
 iron oxides; 233
 iron rich sediments; 822
 irrigated rice fields; 605
 Israel Pedrosa; 897
 kinetic stability; 929
 knowledge; S100
 knowledge capitalization; S26
 laboratories; 732
 Langmuir and Langmuir-Blodgett (LB)
 films; 502
 lanthanide; 805
 layered zirconium phosphates; 46
 LC-MS; S107
 leaf-cutting ants; 983
 Lewis acid; 1010
 ligninolytic enzymes; 629
 lipase and enzymatic treatment; 296
 lipase; 792
 lipases; 614
 lipid oxidation; 655
 lipids; 296
 liposomes; 511
 lock and key model; 95
Luehea divaricata; 834

- luminescence; 805
lytic proteases; 871
- macrophages; 405
magnesioferrite; 5
magnetic adsorbents; 751
magnetic moment calculations; 340
magnetic nanoparticles; 842
malonaldehyde; 655
maltodextrin; 596
manganese; 1000
marine sponge; 192
market and technology mining; S112
materials chemistry; 670
materials science; 281
medical applications; 111
medicinal plants toxicity; 519
Memora peregrina; 199
mercury; 438
mercury fluxes; 968
mesoporous materials; 37
metal adsorption; 397
metal complexes; 326
metallic complexes; 1038
metallic contaminants; 751
metal-saccharinate bonds; 326
methane combustion; 952
microcontroller; 1102
microwave reactor; 73
microwave-assisted decomposition; 137
molecular dynamics; 95
molecular fluorescence; 910
molecularly imprinted polymers; 1076, 1087
molluscicidal activity; 575
monitoring; 462
monitoring; 975
Monte Carlo methodology; 548
montmorillonite; 777
Mosher's reagent; 1061
Mössbauer; 5, 233
multicomponent reaction; 1010
Multi-LED photometer; 1102
multivariate analysis; 337
multivariate regression; 838
- N-acetyl-L-cysteine; 797
nanotechnology networks; S48
natural gas; 957
natural water; 579
NaX zeolite; 397
neodymium; 964
new treatment processes; 130
Ni(II) octahedral complexes; 153
nickel; 1116
nitric oxide; 1046
nitrofuran; 809
nitrogen; 211, 957
- NO-donors; 1046
nonionic surfactant; 426
non-parametric statistics; 179
nordiazepam; 773
NOS inhibitors; 1046
no-tillage; 329
nudibranch; 192
- observatory of industrial activities; S112
olefin metathesis; 692
optical sensor; 932
optode; 932
organic components; 859
organic-inorganic hybrid materials; 281
organochlorine compounds; 941
organophosphorus pesticides; 747
oscillometric detector; 1106
overview of Chemistry in Brazil; S7
oxidative stress; 887
oxyallyl cations; 444
oxygen reduction reaction; 664
- PAH; 409
palladium; 402
palladium catalyst; 952
palladium(II) complexes; 405
palm oil; 633
parallel factor analysis; 910
particle size; 397, 952
passive film; 204
Pasteur's Quadrant; S95
patent; S36
patent databanks; S36
PbO₂; 766
PbTiO₃; 10
PCA; 492
pentacoordinate; 829
periodic method; 10
perovskite; 10
perspectives and needs; S7
pH sensor; 932
pharmaceutical formulations; 797
pharmaceutical industry; S107
pharmaceuticals; S64
pharmacophore; 244
pheromones; 472
photocatalysis; 921
photodegradation; 409
pillared clays; 777
Pilocarpus riedelianus; 986
plasma extraction; 773
plasma polymerization; 1006
platinum (II) complexes; 809
PM3 semi-empirical method; 456
pollution; 788, 975
poly(styrene sulphonate); 964
polychlorinated biphenyls; 941
- polycyclic aromatic hydrocarbons; 941
polyethylene terephthalate; 188
polymer; 65, 255
polymer blends; 255
polymeric precursor method; 842
polymerization process; 1076
post-consumer polymer; 65
potentiometric precipitation titrations; 817
preconcentration; 145
precursors; 141
preparation methods; 1030
pressure swing adsorption; 622
process development; S64
professional education; 350
projects; 360
PRONFAR creation; S56
propolis; 801
Pseudopiptadenia contorta; 421
public and regional policies; S79
- QSAR; 30
quantum chemistry teaching; 360
quantum yield; 805
quebracho tannins; 421
quinine; 244
quinones; 591
- R&D networks; S52
R&D productivity; S76
Raman dispersion; 289
rare earth; 233
rare earths; 111
recycling; 65
reference material; 497
refraction colors; 897
remediation; 61
research and development public policies; S104
research organization; S48, S52
research policy; S91
resonance energies; 929
review; 642
riboflavin; 887
rice husk ash; 1055
rice husk; 1055
ricinine; 983
Rietveld; 5
ring contraction; 703
ring-closing metathesis; 692
Ruetsap's Quadrant; S95
Rutaceae; 224
- saccharin; 326
saccharinate; 326
saponins; 601
satellite propulsion; 42
sequential extraction; 822

- sesquiterpenes; 591, 986
sialic acid; 306
silica; 544
simulated distillation; 478
simultaneous atomic absorption spectrometry; 539
single-source precursor; 761
social inclusion; S91
sodium alendronate; 852
soil carbon determination; 329
soils; 438
solar; 847
solenoid valves; 217
sol-gel; 238
solid fat content; 633
solid phase extraction disks; 747
solid-phase organic synthesis; 73
solid-phase reactor; 783
solvent-free organic synthesis; 1111
sorghum; 451
sorption isotherm; 451
sources; 859
spectrophotometry; 838
spectrophotometry UV-Vis; 583
spectroscopy; 111
SPME sampling; 646
square wave voltammetry; 1000
steel; 204
steroids; 610
Stokes Quadrants; S95
stored products; 472
structure-properties-applicability relationship; 281
sulfadiazine; 727
sulfate ion content; 54
sulfonamide drugs; 727
sulfur; 211
supported metallic catalysts; 529
surface synthesis; 393
sustainable development; 103
synthesis; 77
synthetic applications; 1030
tannins; 892
TBA test; 655
teachers; 1123
teachers' development practice; 1123
teaching experiment; 544
TEOS; 1006
Terminalia brasiliensis; 996
terpenes; 85
thermal analysis; 183
thermal cracking; 364
thermal decomposition; 761
thermogravimetry; 713
thiazole; 77
thin films; 141, 842
thin layer chromatography; 409
thiosemicarbazone; 1030
tiquira; 583
titration; 54
titrimetry; 166
Tocoyena brasiliensis; 601
total polar compounds; 947
transalkylation; 37
transesterification; 19
transformer oil; 535
transition metal ions; 1038
transparent electrode; 345
treatment of residues; 732
trends in Science, Technology and Innovation; S112
triterpene; 996
triterpenes; 183, 834
triterpenoids; 610, 801
tropical soils; 1014
tuberculosis; 678
tungsten coil atomizer; 217
ultraviolet; 927
uncertainty; 497
undergraduate experiment; 723
undergraduation courses; S11
university extension activities; S100
unknown waste; 157
uranium and thorium recovery; 157
urucum; 149
UV-cabinet; 927
validation; 50
vanillin; 642
vegetable oils; 947
vibrational spectroscopy; 289
VOC; 646
voltammetry; 1116
waste management; 732
waste water; 921
wastewater; 296
water; 747
water pollution; 605
“wet blue” leather; 433
XPS; 204
X-ray diffraction; 670
Xylaria sp.; 991
YAG; 238
Zanthoxylum ekmanii; 224
zeolite 13X; 622
zeolite/iron oxide composite; 751
zinc determination; 817
zinc-ion selective electrode; 817
